CONSEJOS LIMPIEZA ANTISLIP POLISHED

Se recomienda la utilización de adhesivos cementosos tipo C2 y material de rejuntado en base cementosa tipo CG1 cuando no se requiera de impermeabilidad y tipo CG2WA cuando sí que sea requerida. Tras su colocación, se recomienda limpiar inmediatamente el material sobrante con la ayuda de una esponja y agua. No se recomienda la utilización de adhesivos ni material de rejuntado en base epoxi.

CLEANING TIPS FOR ANTISLIP POLISHED

A C2 cement-based adhesive should be used, together with a CG1 cementitious grout when no waterproofing is required or CG2WA grout when it is. After laying the tiles, clean away any surplus material immediately using a sponge and water. Do not use epoxy-based adhesives or grout.
